Projects

SCORE-GO �   **Sep '22 - Apr '23**

A Personalized Cricket Scoring Website | Express JS, HTML, CSS, JavaScript and MongoDB
- Solved the problem of manual scoring by providing a platform to digitally record cricket matches.
- Stored the match data efficiently and provided analysis using charts and tables.
- Key features: unique design, strong backend, scorecard, live streaming and match analysis.

WCE Hackathon '24 ⚲   **Jan '24 - Feb '24**

Hackathon Platform | MongoDB, Express JS, React, Node JS, SweetAlert
- Developed a rich intuitive user interface using React, providing seamless navigation and user experience.
- Implemented backend to handle registrations, authentications and sending emails.
- Ensured optimal responsiveness across devices and screen sizes by employing CSS media queries.

Maha Vaccination Drive ⚲   **Jul '22 - Aug '22**

Vaccine Management System | Java, AWT, Swings, JDBC, MySQL and MVC architecture
- Real-time platform to book vaccine appointments with vaccine tracking and confirmation functionalities.
- Key features: registration, OTP validation, book appointments, update vaccine stock and admin dashboard.

SmartStock GPS ⚲   **Jun '23 - Aug '23**

Inventory Management System | Express JS, JavaScript, MongoDB and Bootstrap
- A comprehensive solution designed to efficiently handle and control stock within a college.
- Developed for managing student purchases in the college thereby improving overall operational efficiency by 90%.
